Screw Products, Inc Obtains Assets of: DeckLok, The Advanced Lateral Anchor

Jonathan Morisset Professional Sales Contractor to Drive Pull Through Sales

Screw Products, Inc. hires Sales Independent Contractor to help past DeckLok accounts revive the product base and help drive reorders.

Gig Harbor, WA – Screw Products, Inc. is delighted to welcome Jonny Morisset based out of Washington State, to the Professional Sales Team at SPI! Morisset will be acting as an Independent DeckLok sales manager, whose main focus is to expand DeckLok sales in North America. Jonny is a believer in deck safety and is glad to be promoting a product he believes in.

Morisset, while not working hard for his customers, is a family man who enjoys traveling and playing with his two dogs. Jonny has been in professional sales for 14 years and is deeply committed to customer service. Screw Products, Inc. is happy to have found a professional with the same dedication to Customer Service (second to none), Quality Products and Prompt Service!

Morisset has noted, "Back in 2001, I was attending a college graduation party when a 2nd story deck collapsed, killing one 18 year old college student and injuring many more!! After the dust settled it was discovered that the deck failed because it was structurally flawed at the deck to housing connection. I only wish now that DeckLok had been used so that 18 year college student would still be with us today!!"

If you currently have stock of DeckLok - The Advanced Lateral Anchor and would like some help with pull through sales assistance, please contact Jonny:

To set up an appointment with Jonny please contact: 253-973-1145 or jkkmr@hotmail.com

Screw Products, Inc. has recently acquired the assets of DeckLok Bracket Systems. DeckLok is a patented, Advanced Lateral Anchoring system that significantly strengthens the critical connections of your Deck!

- For rail posts, DeckLok creates a bolted connection, oriented in shear, between the rail post and the deck floor joist. A single DeckLok lateral anchor provides a 500 percent strength increase over current construction methods.
- For ledger boards, DeckLok anchors the deck's ledger board to the floor joists of the house. Each set of anchors used provides up to 4,000 pounds of resistance to deck pullout and collapse.
- For stair stringers, the DeckLok Advanced Lateral Anchor reinforces the connection between the stair stringer and the deck frame to reduce the possibility of the stairs shifting away from the deck and collapsing.

Simply put, your deck will be dramatically stronger and safer.
