

**Re: New Improved Fastener Coating for use with Chemically-Treated Lumber**

In response to industry concern over potential fastener corrosion when used with chemically-treated lumber, Screw Products Inc. has upgraded the protective coatings applied to our exterior coated fasteners. Our Bronze Star line is coated with SKTII coating. It is a proprietary material and method of application that has shown over **1200 hours corrosion resistance in BOTH ACQ and salt spray conditions**. SKTII also exhibits outstanding abrasion resistance. The new coating will be a light bronze color.

Our Composite Deck screws have an e-coat applied to them that exceed 1000 hr salt spray and come in 16 different colored heads. We hope that this change will give our customers another reliable option in addition to our Stainless Steel fasteners in ACQ and salt spray conditions.

If you have any questions or concerns regarding these coatings please do not hesitate to contact Screw Products, Inc. toll free at **1-877-844-8880**

**Thank you for your business and continued support.**
