## Screw Products Inc. Color-Matched C-Deck Screws Available in 17 Colors

Composite Star Drive Screws are Trex® approved and match a larger number of deck designs

**Gig Harbor, Wash.** – With names like Mountain Cedar, Vintage Lantern and Fire Pit, the 17 color options offered by C-Deck Composite Star Drive Deck Screws make them a perfect match – literally – for nearly any deck.

Indeed, C-Deck Star Drive Screws match most composite deck colors on the market today, and [Screw Products Inc.](#) can complete custom color orders.

The deck screws are for use with interior and exterior wood, composite, and other plastic materials, and are approved fasteners for the Trex® *Transends*® and select *Enhance*™ lines. Trex is the largest manufacturer of wood-alternative decking and railing products in the nation, boasting products made from reclaimed plastic and wood that contribute to a building's LEED points. In addition, C-Deck Composite Star Drive Deck Screws match the decking of leading manufacturers TimberTech, Fiberon, Azek Deck, EverGrain, Gossen, Tuf Board, Monarch, Enduris, NyloBoard, Latitudes Decking & Railing, and MoistureShield. [A simple chart](#) helps customers match decking to the correct color-match fasteners.

Specifically designed to eliminate the mushrooming and blemishes that can occur in composite materials, the deck fasteners also pull down and hold warped lumber and lock boards together when used with wood decks.

Screw Products Inc. created the color-coated head fasteners with extra sharp drilling points to eliminate predrilling. The screws' E-Coat finish has also shown more than 1,000 hours of corrosion resistance in both salt spray testing and treated lumber, and Screw Products Inc. Finally, all Screw Products Inc. screws feature star drives, which allow for an easy start and drives with less torque.
